EXAMINER'S AMENDMENT AND STATEMENT OF REASONS FOR ALLOWANCE

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert S. Babayi (Reg. No. 33,471) on 10/7/2004.

2. The application has been amended as follows:

Cancel claims 22-28.

1. (Currently amended) A keypad for entering letters, comprising:

an array of keys with each key being assigned to at least one letter of an alphabetical system based on the frequency occurrence of the at least one letter in a typical body of written work, wherein the alphabetical system comprises at least one most-frequently-occurring letter that is entered by more than one key activation associated with the same key and at least one less-frequently-occurring letter that is entered by at least one key activation with each of at least two different keys.

19. (Currently amended) An information entry method for a keypad, comprising:

(a) determining the frequency of occurrences of letters in a typical body of written work that is based on an alphabetical system;

Art Unit: 2643

(b) assigning letters to an array of keys based on the frequency of occurrence of the letters;

(c) activating at least one of the keys in accordance with a key sequence that correspond to a selected letter, wherein for a most-frequently-occurring letter, the key sequence requires multiple activation of the same key, and for a less-frequently-occurring letter, the key sequence requires activation of two different keys; and

(d) generating a character signal corresponding to the selected letter in response to the key sequence.

Examiner's Statement of Reasons for Allowance

3. Claims 1-21 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a method and apparatus for alphanumeric data entry using a keypad that is convenient in use, while increasing the speed by which text data is entered into a keypad (i.e., the keypad for entering letters including an array of keys with each key being assigned at least one letter of an alphabetical system based on the frequency occurrence of at least one letter in a typical body of written work so that the entry of the most-frequency-occurring letter is entered by more than one activation of the same key and the entry of the less-frequency-occurring letter is entered by activation a key assigned to the less-frequently-occurring letter and than activating another key to which the position element of the less-frequently-occurring letter points to).

Applicant's independent claims 1 and 11 each recite, *inter alia*, a keypad with a specific structure as defined in the specification for entering letters comprising an array of keys with each key being assigned to at least one letter of an alphabetical system based on the frequency occurrence of the at least one letter in a typical body of written work, wherein the alphabetical system comprises at least one most-frequently-occurring letter that is entered by more than one key activation associated with the same key and at least one less-frequently-occurring letter that is entered by at least one key activation with each of at least two different keys. Applicant's independent claims 1 and 11 comprise a particular combination of element, which is neither taught nor suggested by the prior art.

Application independent method claim 19 recites, *inter alia*, assigning letters to an array of keys based on the frequency of occurrence of the letter, activating at least one of the keys in accordance with a key sequence that correspond to a selected letter, wherein for a most-frequently-occurring letter, the key sequence requires multiple activation of the same key, and for a less-frequently-occurring letter, the key sequence requires activation of two different keys. These steps, in combination of the remaining steps, are neither taught nor suggested by the prior art.

Accordingly, Applicant's invention is allowed for these reasons and the reasons recited by Applicant in Amendments and Appeal Brief.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
